求职意向

意向岗位: 课程助教

意向城市: 北京市

Personal Information

- Name: Alice Wang
- Email: alice@student.bupt.edu.cn
- Current Location: Beijing, China

Job Objective

- Target Position: Course Teaching Assistant
- Preferred Location: Beijing
- Employment Type: Social Recruitment

Self-Assessment

I am a third-year undergraduate student majoring in Software Engineering with solid professional foundation and strong passion for teaching and tutoring. I am patient, responsible, and skilled at translating complex technical knowledge into easy-to-understand content, which enables me to effectively help students solve various problems in programming learning. Through the teaching assistant position, I hope to combine my professional knowledge with communication skills to support curriculum implementation and practically help students improve their programming capabilities.

Educational Background

- Duration: 2022.09 - 2026.06
- Institution: Beijing University of Posts and Telecommunications
- Major: Software Engineering
- Degree: Bachelor (Ongoing)
- Admission Type: National Unified Recruitment

Professional Competencies

- Programming Languages:** Java, Python, SQL
- Development Tools:** VS Code, IntelliJ IDEA, MySQL

- **General Abilities:** Code debugging, technical documentation writing, problem decomposition and resolution

✂ Teaching Assistant Competencies

- **Curriculum Support Capability:** Up to 20 hours of flexible working time per week, which can adapt to the time requirements of various teaching scenarios including experimental course tutoring, homework grading, and Q&A sessions. I am proficient in multiple programming languages and development tools, fully competent in experimental guidance, homework grading, and daily Q&A for programming courses.
- **Knowledge Explanation Ability:** Strong willingness for teaching and tutoring, skilled in decomposing complex technical concepts into easy-to-understand content, and able to quickly identify students' learning difficulties and provide targeted guidance. I have helped classmates sort out programming ideas and solve code bugs for many times, and received consistent recognition from peers.
- **Service Guarantee:** Currently holding no other teaching assistant positions, I can devote myself fully to the new TA work, support both online and offline tutoring scenarios, and ensure timely email response to provide efficient support for teachers and students.
